## Discover

From the 7th century onwards, men and women of different faiths and cultures built on knowledge from ancient civilisations making breakthroughs that have left their mark on our world. Arab, Persian, Indian, Turkish, North African, Spanish, Sicilian and other nationalities and cultures formed this large area of Muslim Civilisation that included men and woman scholars of Muslim, Jewish, Christian, Sabeen, Hindu and other faiths.

Knowledge from Assyrian, Babylonian, Chinese, Egyptian, Greek, Indian, Persian and Roman civilisations was highly prized in the Muslim Civilisation. Scholars advanced science by building upon ancient wisdom, making breakthroughs that have had a huge but mostly unknown influence on our world.

From astronomical discoveries in the vast sky to navigating and exploring the deep blue seas to fascinating observations of the rich diversity of the animal kingdom to innovations in medicine and ingenious machinery — DISCOVER more about these exciting topics and more **from the golden age of Muslim Civilisation** through these feature stories!
